

BAPTIST PICNIC HUGE SUCCESS

HELD IN IDEAL WEATHER;
LARGE GATHERING ENJOYED
ANNUAL EVENT

Enthusiasm of youth combined with ideal weather to make the annual get-together picnic of the Baptists of Central Alberta, at McLaurin Beach, Gull Lake, on May 25th, one of the most successful on record.

Representatives were present from

Calgary Red Deer, Lacombe, Clive, Stettler, New Norway, Bright View, Ponoka and Leduc. Red Deer, with an attendance of 75, topped the list, Clive, with 65, coming second, Ponoka with 30 coming third, and so on down the line. Between 200 and 300 were present.

After the noonday meal in the spacious dining hall and out on the ground, swimming, boating and baseball were indulged in. Clive won the baseball game against a team

Interesting Address
At 4:00 p.m. the assembly hall was filled, when religious exercises were held under the chairmanship of Rev. J. A. Roskam of Ponoka, An.

interesting address was given by Rev. T. Jaskesike, German Baptist minister from Ledue, on the subject, "Violin Strings." The speaker said every string had its definite place and its definite purpose to fulfill. So also each of us has a definite place and definite purpose to fill in the plan of God, which no one else can fill. Then every string, in order to give a tone, must be fastened top and bottom. So also with us—every string must be stretched and drawn

SPRUCEVILLE. — Mr. and Mrs. Archie Stout have another son, born last week.

The Junior C.F.A. have been real Busy Bees the last week. The meeting Saturday night was very successful, about 40 being present. Miss Archibald of Rimbye, vice-president of the Juniors, was present and gave a splendid address. Bill Stout and Jack Burton were chosen to attend the Young People's Farm Week in June. Monday night the Juniors gave a very successful play, which was followed by a dance which filled

Mrs. C. C. Burton has now become a tractor owner.

HUGH H. COLWELL PASSES ON

Hugh H. Colwell passed away in the Lacombe Hospital on Tuesday, May 26th, following a short illness. Mr. Colwell, who was an employee of the Lacombe Experimental Station, where he was a conscientious worker, was born at Chesley, Ont.

and reached his 39th year on May 4th. He came to Lacombe about 15 years ago. He was a returned man and had been suffering for several years from wounds received in the Great War.

Mr. Colwell was a member of the Lacombe branch of the Canadian Legion and also of Modest Lodge

tion and also of Magnolia Lodge No. 12, I.O.O.F. These two organizations had charge of arrangements for the funeral, which was held today (Thursday) at 2:30 p.m. from St. Andrew's United Church.

Much sympathy is felt for those

surviving, who are: His widow Mary and three small children; his mother who resides in Owen Sound, Ont.; two sisters, Mrs. E. Greer of Chesley, Ont., and Mrs. M. Thompson of

Neepawa, Man., and four brothers
Will and Howard of Compeer, Vera
of Olds and James of Langdon.

WORLD HAPPENINGS
BRIEFLY TOLD

Mail service of 14 days from England to South Africa is specified in contracts entered into by the British post office department.

Medical reports disclosed that 1,400 persons died of cholera in Spain from the beginning of the outbreak in February to mid-April.

A swarm of stingless bees arrived in London from central Africa for experimental purposes and some will be released to see if they are homers.

Italy has lost \$160,000,000 in gold—almost half her previous bullion reserve—since the outbreak of the Ethiopian war, the financial newspaper L'Information declared.

The sixth annual report of the National Radium Commission says Britain's radium is running out and more is badly needed to carry on the treatment of cancer.

A cargo of fur valued at close to \$100,000 reached Edmonton by train from McMurray to where it had been flown by northern aeroplanes from various ports.

South African motorists need expect no relief from taxation till the roads are put into thoroughly good order throughout the country, highways officials have intimated.

The Canadian Shipping Act, one of the most voluminous ever passed by the Canadian parliament, will come into force on Aug. 1, Marine Minister Howe stated at Ottawa.

Automobile accidents for the first two months of this year increased 11.6 per cent. over the same period last year, according to announcement by the Ontario motor vehicles branch.

Government statistics, which state that seven years have been added to the expectation of life since 1911, say London's suburban residents are healthier than the rest of England's people.

Has Strange History

Centuries Ago Dying Woman Founded Tichborne Dole

A strange history attaches to the "Tichborne Dole," which was recently distributed at Tichborne Park, Alresford, by Sir Anthony Tichborne. Centuries ago a Lady Tichborne, when on her deathbed, asked her husband to set aside money to provide for an annual gift to the poor in her memory. Her husband, by no means a model character, snatched a blazing brand from the fire and told her he would set aside the revenue from as much land as she could walk around before the brand burnt out. She accepted the challenge, had herself carried out, and contrived to crawl on hands and knees in a circle enclosing several acres before the brand spluttered out. The "Dole" is distributed in flour, and even during the war years it was continued by special permit of the Food Controller.

Hapsburg Very Poor

Pretender To Austrian Throne Knows What Hunger Means

Major Josef Jirovisek of Vienna, leader of the Imperial Army, told a meeting of Legationists in Vienna that Archduke Otto of Hapsburg, pretender to the Austrian throne, is so poor that he does not get enough to eat.

"On a visit to the Royal Family, I learned that meat is rarely seen on the table," the Major said, telling of a recent trip to Steenkerke Castle, Belgian seat of Otto's exile. "I attended a mass in the castle chapel and noticed a hole as big as a two shilling coin in the shoe of one of the Archdukes."

His speech started a campaign to enlist sympathy for the "poverty-stricken Hapsburgs."

Boy Scout Meet

World Jamboree To Be Held In Holland Next Year

The fifth world Boy Scout jamboree will be held in August, 1937, at Bloemendaal, near Haarlem, Holland, according to official announcement received by Dominion headquarters of the Boy Scouts Association.

Plans are under consideration for acceptance of Holland's invitation and the sending of a Canadian contingent of scouts and scoutmasters. It was stated the Netherlands government will mark the event by the issue of a special postage stamp which was done by Hungary for the previous jamboree held there in 1933.

Indians To Stage Pageant

Italians in Vancouver plan to reenact the discovery of America by Christopher Columbus in a pageant to be presented during the coast city's jubilee celebrations this summer. A replica of the navigator's ancestral home will also be erected.

"Bring me a bowl of clear soup and a large screen," ordered the man with the new set of false teeth.

"Why the screen, sir?" asked the waiter.

"So I won't be able to see that fellow at the next table eating a porterhouse steak."

Jack Miner Foundation

Ontario Government Gives Royal Assent To The Incorporation Bill

In 1931 The Jack Miner Migratory Bird Foundation was incorporated in U.S.A. Last week the Ontario Government put through special legislation, known as "The Jack Miner Bill," giving royal assent which incorporates the said foundation in Canada, and allows the said foundation to do business, such as soliciting contributions and bequests, and owning land in Canada as bird sanctuaries.

Jack Miner has agreed to give his home and bird sanctuary to the said foundation, when men and women have contributed enough funds to The Jack Miner Bird Sanctuary.

All money, such as gifts or bequests, are to be held in trust, and only the annual interest used to pay the upkeep and expenditure on The Jack Miner Bird Sanctuary.

The object of the foundation is to raise one million dollars to be held in trust, so that there will be enough annual interest to also carry on educational campaigns in the public schools of Canada to educate the youth on the value of bird life to the Dominion. Jack Miner's motto is "Educate instead of legislate!"

More education and less legislation. The Ontario Government giving its royal assent, assures the continuing public that the legal set-up is on a solid basis, and that there can be no money mis-used in any way, as all gifts and bequests are to be held by a trust company and invested in government bonds.

Jack Miner's Bird Sanctuary is known the world over, and now the establishment of The Jack Miner Migratory Bird Foundation will more or less make his place an international park, and his life work will be carried on by the interest from money contributed by donations or bequests to the said trust fund, known as The Jack Miner Foundation.

Jack Miner says "Is it not as sane for his wealthy friends to leave a few hundred thousand dollars to The Jack Miner Foundation, where birds can always be seen alive and saved from extermination, as it is to leave several millions to museums where only dead, stuffed specimens can be seen in glass cases?"

Jack Miner has been well known to all the men and women who perpetuate his home and bird sanctuary will become as famous as Jack Miner throughout the world, and their names will go down in history with Canada's well known birders, naturalists, philosophers, lecturers and authors. The slogan among Jack Miner's friends is "When making your will remember The Jack Miner Migratory Bird Foundation."

Renovating Famous Inn

Hostelry Directly Connected With Italian History Will Be Rebuilt

Dante's favorite Roman Inn has been purchased by the Italian government for \$200,000 and will be restored to its original condition.

Albergo dell'Orso—Bear's Inn—which was built early in the 13th century, was inherited by Dante when he came to Rome toward the beginning of the year 1300 as one of the thousands of pilgrims who visited the Eternal City during the papal jubilee proclaimed by Pope Boniface VIII.

In 1900, after having served as an inn for seven hundred years, it ceased to function as such and the long neglected structure became a warehouse.

The history of the hostelry, considered as probably the oldest in Italy, is closely tied with the history of Rome and of the Italian Renaissance. For several hundred years it was frequented by visiting statesmen and ecclesiastics and was famous throughout Europe for its exquisite Roman cuisine and well-stocked cellar.

An expert who is at present making a study of the edifice for the government told International News Service that the beauty of original structure is concealed beneath the grime of seven centuries and of additions and alterations which were made from time to time.

Reclaiming Land From Sea

The British colony, Port of Spain, Trinidad, is being enlarged at the expense of the Atlantic ocean. Already 80 acres of land have been added to the area as the result of reclamation work being carried out by the Trinidad government. S. R. H. Beard, resident engineer, stated reclamation work was not yet finished and was progressing at a satisfactory pace.

Employees Run Factory

Victor Weiner, who once owned a leather manufacturing plant at Patzan, Czechoslovakia, has just taken a position there as clerk under his former workers. Threatened by financial difficulties recently, he presented the factory to his employees under condition that they would employ him.

In one part of the Near East we are told, a husband ties a stocking round his wife's chin if she is talkative. This is certainly more humane than a sock on the jaw.

Locate Temple-Fortress

Ancient Citadel And Temple Of Worship Is Finally Uncovered

A combined expedition of the University of Pennsylvania museum and the American School of Oriental Research, under Charles Bachiler, has announced discovery, at Tepe Gawra, in Northern Mesopotamia, of a combined citadel and temple of worship.

Antedating by nearly 3,000 years the earliest Biblical reference to a combination fortress-temple, the recent find of a massive circular building of sun brick climbed seven seasons' work on the "great mound" 15 miles from Mosul.

The ground plan was described by Dr. E. A. Spieser, director of the American School of Oriental Research in Bagdad, as "startling." The building is an almost perfect circle, 70 feet in diameter. The wall is more than three feet thick, and encloses 17 rooms, with only one narrow opening breaking it.

Info this roundhouse hundreds could rush in time of danger. Careful examination of the architecture convinced museum officials that the building was not merely a fortress, however. The central part, compared with other temples, seemed to have been designed for worship.

"Temple towers were mentioned in the Bible as places of last refuge," said Dr. Spieser, "but the Biblical references were of about 1,000 B.C., and this one is 3,000 years earlier. One reference is found in Judges 9, telling of the slaying of Abimelech, and mentioning 'the strong tower within the city' to which 'fled all the men and women, and all they of the city, and shut it to them, and gat them up to the top of the tower.'"

Dr. Spieser related that N. T. Belaisov, a Russian colonel now living in Paris, had made a study of weights and measures found at several points in the Near East, and had become convinced that a culture existed in Mesopotamia before the mysterious arrival of the Sumerians. The round house, according to Dr. Spieser, has no connection with the Sumerians, and antedated them by some 500 years.

Bagpipers For Russia

Glasgow Firm Has Just Completed A Large Order

Bagpipe factories of Scotland are making more instruments than in several years, and the demand from foreign countries has taken a jump. A Glasgow factory has just finished an order for Russia. Half of the bagpipes produced in Scotland are exported. Many of them go to Scotland in Australia, Canada, and other parts of the world. One firm has regular customers in Brazil, China, Japan, India, Australia and Alaska. Among the firm's regular customers are the Prince of Wales and his piper, Alister Fletcher, of the Scots Guards.

Bagpipers for Russia cost \$35 to \$150. Those used in military bands usually cost about \$75 each. The most expensive set made by the firm for a customer cost \$1,500.

Too Highly Rated

Health Value Of Spinach Is Not Great

Good news for spinach haters! The leafy vegetable, obnoxious to many, but with a widely heralded health value, is losing its high standing, discussions at the opening session of the American Institute of Nutrition at Washington revealed.

Spinach has been considered a valuable food because it has a high content of blood and bone building iron and calcium. Less than half of the iron content of spinach, however, and less than a third of its calcium are in a form that can be used by the body, it appears from a report by Dr. M. K. Horvitt and G. R. Cowgill of research made by them at Yale University with the late Prof. L. B. Mendel.

Good Publicity For Hotel

Budapest Has Swimming Suit Belonging To King Edward VIII.

When the Prince of Wales retired to the swimming pool in the Gellert Hotel, in Budapest, Hungary, last year, a swimming suit and bathrobe were presented to him. Urged to take the gifts with him when he departed, he said they might be kept at the hotel until his next visit. Now the suit and robe are on display in the hotel, with a sign reading "Property of His Majesty King Edward VIII, left in the city of Budapest's safe custody."

A Tropical Fruit

A fruit that looks like a dried apple, tastes like a pineapple and bunnies and has the pithy core of an orange is delighting Victoria connoisseurs. Known as a custard apple or cheri now, it has been introduced from the tropics, where it grows in its native state.

"Why did you tear the back part out of that new book?" asked the long-suffering wife of the absent-minded doctor.

"Excuse me, dear," said the famous surgeon, "the part you speak of was labelled 'Appendix' and I took it out without thinking."

New Zealand has no native mammals, except bats.

"HOME DEFENCE LADS"

PRIVATE J. BULL: "We can't go short-handed! We'll help to man the gun!"

A Rare Occurrence

St. Paul's Cathedral Had Third Burial Within Six Months

The rare incident of a third burial within St. Paul's Cathedral in six months happened April 18, when Louise Creighton, widow of a former Bishop of London who died in 1901, was buried beside her husband in the crypt.

It is doubtful if any woman has been buried in St. Paul's since the great fire in 1666. Mrs. Creighton was 86. Her husband was regarded as one of the greatest historical scholars of his generation. His wife possessed an impressive intellectual gifts, her biography of her husband having been considered a masterpiece.

After her husband's death King Edward VII. granted her apartments at Hampton Court palace. Subsequently she removed to Oxford. Her husband was the immediate predecessor of the present Bishop of London.

The other recent burials within St. Paul's were those of Lord Jellicoe in November and Lord Beatty in March.

Planning Arctic Drift

Special Wooden Ships Are Being Designed By Soviet

For drifting in Polar waters, a special wooden ship of 1,000 tons displacement, 400 h.p. oil-burning engine, is being designed at the Arctic Institute in Leningrad.

Drifting from the Fram on which Fridtjof Nansen sailed to Arctic waters and carried out his drift, 1892-96, the Society ship will be towed to the high northern latitude by an icebreaker. The Arctic drift is to last approximately four years.

Fifteen Soviet scientists will embark on the expedition, occupying themselves with hydrological, hydrological work and hunting, as well as questions connected with the atmosphere, the sea at depth, and magnetic and other phenomena of the Polar region. The vessel will carry an aeroplane, have five well-equipped laboratories, a library and cabins with all modern conveniences.

Ancient Bible Restored

Codex Sinaiticus Is Beautifully Bound In Two Volumes

After two years' work, the Codex Sinaiticus, the ancient Bible manuscript which was bought by England from Russia for \$500,000, has been restored. When it arrived in England it was in a quaint old tin box, its pages were tattered and crumpled, some of them were loose. It was wrapped in cotton. Now it has been beautifully bound in two volumes, which were shown for the first time recently to the trustees of the British Museum in London. Soft colored oak boards, specially prepared, encase the volumes, which have white morocco backs. In gold letters upon them the Codex is described as "British Museum Additional MS. 43,725."

Experts declare the Codex will now last for at least 500 years more.

The Canadian Badger

Lives Underground And Is Seldom Seen In Daytime

The Canadian badger is a low, thick-set animal, its body broad and fat, ears short, tail short, legs very short and powerful. Its coat is silvery gray. A white stripe runs back from the tip of the nose. It is more carnivorous than the European badger. It hibernates during the cold months of winter, and is the only member of the weasel family to do so.

The badger lives for the most part underground and is seldom seen abroad in daytime. It can be a ferocious, dogged fighter when cornered and badger-baiting used to be a popular sport.

An expensive candy, in pill form, is used by actors in making moving pictures of winter scenes. The candy gives off a vapor when dissolving and thus simulates breath in wintry weather.

Here's a Six-sided Way To Beauty

Is it an heirloom? admiring friends will ask. And how proud you'll be to make it all yourself, both quickly and easily. Just follow the clear directions for the easy-to-knit triangles, which repeated and joined, form a striking, six-sided medallion. If knitted in string, you'll find your bedspread, cloth, pillow top or sofa set doubly durable.

In pattern 5584 you will find complete instructions for making the triangle shown; an illustration of it and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

Natural Chemical Factory

Chemists Seek Treatment For Some Ailments In Stratosphere

First clues to a vast natural chemical factory in the stratosphere containing a different kind of oxygen, and even possibilities of use as a flying sanatorium for some ailments, were reported to the American Chemical Society at Kansas City.

Up where the temperatures are 50 degrees below centigrade—58 below zero Fahrenheit—it appears from studies reported by Dr. Malcolm Dele, of Northwestern University, that the oxygen carried aloft in the evaporation of sea water leaves the tiny droplets and transfers to the air, while at the same time oxygen in the air takes the place vacated by the sea water oxygen.

The oxygen of water and that of the air are not the same—a fact Dr. Dele announced a few months ago which has since been confirmed by other scientists.

The difference in the two oxygens is in weight. Both water and air contain oxygen atoms weighing respectively 16 and 18 atomic units. But for some reason the lighter air contains more of the heavy oxygen than does the water.

The net difference is that air oxygen has the atomic weight of 16.0001 while water is 16.0000.

How the stratosphere chemical factory seems to operate was explained at the chemical society's heavy water symposium. When the heavy particles of oxygen leave the water vapor in the stratosphere the water is not turned partly into hydrogen gas, as it would be in other regions.

The reason is that chemical "equilibrium" exists between the air and the vapor in the intense cold and reduced pressures miles aloft. For each heavy oxygen particle that leaves the water droplet, a light one enters, having left its previous residence in the water. The process is called "exchange."

Has Proved A Success

Panel Heating Is Now Widely Employed In England

Panel heating, the most recent departure in heating methods since the central heating plant came into use, is now widely employed in England. Hot water is circulated through coils of steel pipe concealed in the ceiling, from which heat rays are sprayed downward.

Unlike all other methods, by which the air itself must be heated to around 72 degrees for comfort, panel heating produces the same pleasant sensation of warmth as the sun, at an air temperature of 65 degrees or lower. Because the warmth of the invisible rays is retained longer by the skin and clothes, windows can be opened often to dispel any discomfort or dryness.

Cost of installation is high, but operating costs show savings as high as 25 per cent.

Praise For Senate

Lack Of Partisanship And Importance Of Work Is Stressed

An almost entire lack of partisanship in the Canadian Senate was reported by Senator Ivo Campbell in an interview at Niagara Falls.

"Since I've been in the Senate I realize the importance of the work done there in a measure I didn't before," he said. "There is almost a complete absence of partisanship and the great majority seem to be just intent on the business of the country as it comes before them."

"They approach it as a judicial body. The small number of women in the legislature of the Dominion is due, as the world's largest problem of interest women take in political affairs."

Advice To Teachers

Teachers must abandon their apologetic attitude toward the profession and the public discard its conception of the "teacher type," declared Dr. G. W. Kerby, principal of Mount Royal College, Calgary, in an address at the Alberta Teachers' Association convention. Dr. Kerby declared the attempts made by some communities to keep the teacher's social life in a narrow sphere. It had been too frequently the case that the community set the teacher aside from life, he added.

Vice-Regal Visit To West

The Governor-General and Lady Tweedsmuir will be in residence at the vice-regal quarters Quebec city from early in June until the beginning of August, it was announced at government house. During that time they will make a tour of the maritime provinces.

The vice-regal party plan leaving about August 6 for British Columbia where His Excellency will open the Canadian-Pacific exhibition on August 26.

Largest Producer Of Platinum

Claiming Canada has passed Russia as the world's largest producer of platinum, J. W. Curran, editor of the Sault Daily Star, said that Sault Ste. Marie hoped to become headquarters of the precious metals industry in Canada. He discussed platinum discoveries contiguous to the Algoma city.

YOUR GARDEN

Even with the most fertile and open soil, expert gardeners stress the importance of thorough cultivation. The preliminary jobs usually be done with a spade or digging fork where space is limited, but in the country where land is still valued by the acre a horse or tractor-drawn plow will be used. At least once during the year, and better still twice, the soil should be thoroughly turned over. Later on just before seeding it is usually best to rake or cultivate finely, in order to break down all lumps. The benefit of frequent light cultivation is twofold. It will destroy weed growth, thus conserving the fertility and moisture. Used by these unwanted plants and it will also conserve moisture from evaporation which is always more rapid in hard, packed, uncultivated soil.

Where the area devoted to the garden is limited, careful attention must be given to such points as the space between rows and between plants, so that all space may be used to advantage. Each plant should have room to mature yet gaps must be avoided. A study of rotation of crops and time of maturity is of great value in planning the small garden. Such crops as radish and spinach may be grown as intercrops between the rows of lettuce, or crops like carrots or parsnips. Late sown crops may be planted between the rows of early maturing crops just before the latter are ready to harvest. Two or three crops of such plants as radish and lettuce may be grown on the same area. A succession of quick growing crops by planting at intervals is also desirable.

For quick results, an important point with the most fertile soil with property which is rented, annual flowers will make a very satisfactory showing all by themselves. They are indispensable, too, in filling in the gaps in the perennial bed which may have suffered severely from winter damage. In almost every section of Canada there are literally hundreds of varieties from which to choose, including almost every conceivable colour, shape and height. There are bushy plants like Dahlias which make excellent backgrounds to serve the purpose until the permanent shrubs assume their size.

There are also plants like the Scarlet Runner Bean, Nasturtiums, Sweet Peas and others which will cover fences, screen walls or even trail over walls. In the standard sorts heights range from the inch high tiny Alyssum to sunflowers, Cosmos and lettuce, which vary from a foot or so to six feet. Many of these things can be planted as early in the season as the first of April until the first of June. For short cuts or unusually early results many annuals may be purchased as well started plants.

Guarded By Police

Former Chief Secretary For Ireland Receives Protection

It was revealed that a police guard is still maintained outside the chambers in Gray's Inn of Lord Greenwood, chief secretary for Ireland during the stormy years of 1920-22.

Lord Greenwood, a native of Whitty, Ont., retired from politics some years ago. But the police guard remains at the chambers and he is constantly shadowed by Scotland Yard men.

These precautions date back to the turbulent period preceding the signing of the Anglo-Irish treaty of 1922, creating the Irish Free State. Lord Greenwood, then Sir Hamar Greenwood, was the last person to hold the office of chief secretary for Ireland as it was abolished under the treaty.

Lord Carson, solicitor-general for Ireland in 1892 and a prominent figure in the pre-war political struggle between pro-British and Nationalist Irishmen, was likewise guarded until the day of his death a few months ago.

Carson constantly grumbled at the insistence of the police upon his carrying a revolver. He said it was a nuisance because it made his pocket bulge.

Old Theory Exploded

Drafts Or Wet Feet Cannot Give People Colds

Dr. J. A. Doull, director of the department of hygiene and public health, Western Reserve University School of Medicine at Cleveland, attacked a few time-worn teachings about the common colds in an address before the medical science group of the Ohio Academy of Science. According to Dr. Doull, "You can't catch cold by sitting in a draft."

"You can't catch cold by stepping into a cold room after a hot bath."

"You can't catch cold by getting your feet wet."

"You can't catch cold by rushing outdoors without an overcoat."

"You can catch cold by infection only."

Must Be A Record

Marliners at Saint John, N.B., have found a record which rivals that of a Budapest barber who claims to have shaved a man in 28 seconds. They produce the record of James S. Pitt, former Saint John resident who died in Cambridge, Mass., and ran 100 yards in one minute.

Mayor Brooks of Cambridge once offered \$500 to anyone who could break Pitt's record, say the old-timers.

The first automobile imported into the United States was exhibited at the World's Fair in 1893.

FLEMING'S FOLLY

— BY LAWRENCE A. KEATINGE

SYNOPSIS

The story opens with Link Fleming addressing a meeting of the Board of County Cattlemen, called together with the object of forming an irrigation company.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilo stay behind and Helen asks Fleming questions about the irrigation plan. This angers Buzz, who accuses Fleming of trying to influence his sister and, as he asserts, ruin his "spread." Buzz shouts at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is uninjured. Buzz is arrested and sentenced to three years' imprisonment.

Helen and Fleming form a partnership to provide irrigation for their own properties.

Fleming goes home and studies the plans drawn by Torney to learn whether they could be adapted to a smaller scheme suitable for his and Helen's land, and is satisfied it could be done. Feeling cold, he lights the fire and there is an explosion that wrecks the house, burns it and the plans and renders Link unconscious. He is rescued from the blaze by an employee.

Helen and Link ride to Rawhide for supplies and to obtain funds to carry out the dam project. They meet Roper, who greets Helen and offers to show her the Link's spread, to see the Sheriff, who tells him Buzz Hamilton has been paroled, and would arrive on the morning stage.

Buzz Hamilton arrives back in Rawhide while Fleming and Helen are in the bank getting a loan for a payment of wages for work on the dam. Roper Kilo and Jackpot Mell meet him and he goes into the saloon with them. By the time his sister and Link come from the bank, Buzz has had several drinks. Roper has distorted the facts concerning the dam proposal to Buzz, making it appear that Link was trying to ruin Buzz. Buzz, inflamed with liquor and anger, tries to throttle Fleming, but is thrown to the floor. Then Helen appears and tells Fleming she has been robbed of the \$500 they had obtained from the bank.

On their arrival, however, they were met by a couple of Link's workmen, who told Fleming that there was a strike at the dam, and that the men were afraid they would not get their wages. Link told them of the robbery and promised them the money as soon as possible. The men reluctantly returned to work.

(Now On With The Story)

CHAPTER XII.—Continued

Once out of sight he removed the bandana from his injured Gyp Vallie and probed for the note Gyp Vallie had dropped. Eagerly he compared it with that just written by Kilo.

Fleming pursed his lips in disappointment. The writings were dissimilar, could scarcely belong to the same man. He crumpled the paper and hurled it away.

Who had put Vallie up to the bit of sabotage Buster Townsend reported?

The trail was strewn with paraphernalia of dam building. Link passed the rickety cabin headquarters of Tom McLendon, the young engineer in charge, but noted that Tom was not inside. He walked on to the concrete abutment, and paused surveying a group of men who worked in two and three in the moist pit below, which would soon be the bed of Silver Lake.

For the thousandth time Fleming thrilled with anticipation and pride as he pictured the future of the Triple H and Star Loop ranches. For weeks the dam had seemed a mirage, a haunting dream that existed only in imagination. But as his savings and those of Helen Hamilton dwindled, and debts mounted, so had the dam progress. At last it was almost completed, a thirty-two foot mass of concrete and reinforcing iron, staunch and challenging to the pressure Silver Creek brought from higher in the Captain Range.

A dream almost become a prac-

DURING MOTHERHOOD

WOMEN who dread motherhood, who suffer from backache and nausea, can be helped by the use of Dr. Pierce's Favorite Prescription. Read what Mrs. Alberta Oram of 136 Fern had yet to be cleared away. There she paused, gesturing for silence.

"—an' you're going to get snaggled when she does come in, boys—I tellin' yuh!" the Box owner boomed seriously. "Course, it ain't none of my affair, but I see lots of these

ticality! Link drew a deep breath. It was small as such projects went elsewhere. But to his mind it was wonderful.

He sighted Buster Townsend below, dirt-empared from tumbling in the silt of the creek bed, and shouted for him to come up. When the foreman obeyed, Link handed him the five hundred dollars he had got from Marty Bush. "Spend it around as much as you can," he instructed. "Let the boys know it's a sign of good faith on my part."

Buster looked astonished. "Say, it's lucky yuh could bring this, Link! They shore ain't workin' like they ought. With everybody sayin' the dam won't pan out an' it's a crazy idea, they ain't got their heart in it. I only hope we can keep 'em on the job," he added triumphantly. "For about two cents they'd all quit yuh right off, money or no money. But it's paid much worse when they ain't paid on time."

As he moved off to the headquarters to divide the cash, Fleming saw Helen and Buzz Hamilton approaching. "Hullo!" he exclaimed in surprise. "I didn't know you were here."

She smiled friendly greeting. "Buzz wanted to see Fleming's Folly, and I came along to answer his objections to it."

The rancher watched Hamilton examining the view from each side of the dam—northwest, the bed of the lake-to-be, and southeast, the yawning aridity of twenty-six hundred acres of "wasteland."

"Are you as crazy as folks seem to think?" Reckon this link is going to hold water all right, eh?" he joked.

Buzz avoided his eyes, and Fleming noted that he had assumed a puncher's garb in place of ill-made prison garments. Yet, however, did he resemble the usual hard-sawed rider of the prairie. His neck was thin in the loose open collar of his flannel shirt, and the very way his leather chaps hung bespoke a man unaccustomed to such garb.

"It looks all right," he replied at last, with emphasis on the second word. "But I'm not falling for any crazy scheme to improve land that isn't worth a ten cent investment."

Link smiled tolerantly. "We'll make a big thing of it just the same. Your half of the spread will be worth a lot more because of his dam."

By the way, he went on, "Marty Bush loaned me five hundred dollars, and Townsend is down payin' it to the boys. We owe 'em a lot more, but that ought to keep peace for now. We're going to succeed yet, Partner!" he chuckled at Helen's look of surprise. "We'll put this over in spite of the odds."

"Maybe yuh will!" Buzz Hamilton started away.

The girl frowned and would have gone after him but Fleming made a quick gesture for her to remain.

"Reckon we staved off disaster for awhile."

She came slowly back. "I feel relieved, Link, but we're still deep in debt."

He noticed her sober, concerned expression and nodded. "Sure are."

"Isn't Otto Pieper likely to call in that two thousand dollar demand note and ruin us?"

He grinned confidence he did not feel. "What put that into yore pretty head?"

"Oh, I don't know. I'm worried about the dam and about Buzz. I want you to know I'm grateful, Link, for having him paroled. But we—well, we had an unpleasant time of you left the ranch. He accused me of being under your thumb, of throwing away the only property Father left—and all for no reason."

"Made it hard for you, I reckon."

Covertly she wiped away a glistening tear and looked into the pit where Townsend was paying off the men. "And he'll make it harder. If I only knew how to handle him!"

Roper Kilo and the other convicts eyed Buzz that building this dam was idiotic. And he seems changed, not like my old brother. He says we are paying Mr. McLendon too much, and the cement people will seize our ranches, or you're in a league with them to get the Triple H, or—of something awful, something terrible!"

Fleming looked into her brown eyes. "I see," he said quietly. "That was plumb generous of Kilo to go out on his way for Buzz's interest. However—"

Someone called out his name. Glancing up, he saw Townsend at the land-end of the concrete, gesturing. Link flashed a look at Helen and quickly hurried to his foreman.

"What is it?"

"Kilo an' Mell have got about eight of the boys down there where we been blasting. They're brewin' trouble." Buster panted, out of breath from the steep ladder climb, and—"I thought—yuh ought to know!"

"Come on!" was the swift reply. "We'll go see Mister Kilo!"

Quickly they descended into the pit at the base of the dam. Buster showed the way among the workings to a spot around a jagged outcropping where heaps of stone and dirt had yet to be cleared away. There he paused, gesturing for silence.

"—an' you're going to get snaggled when she does come in, boys—I tellin' yuh!" the Box owner boomed seriously. "Course, it ain't none of my affair, but I see lots of these

Seven men. . . Seven men . . .

WIFE (to radio entertainer): "Nice bird imitator you are! Why can't you imitate a homing pigeon earlier?"—Smith's Weekly, Sydney.

things, and there's always guys gettin' killed."

"Now, yuh all know I'm a friend of yours. Yuh all know what I've said. I'm straight. I'm just warnin' yuh, because I'm none too anxious to dig into a couple of tons of rock for dead guys. It's dangerous, workin' here!"

"Course it is," supported Jackpot Mell. "Another thing, what are yuh gettin' out of it? Not even full five hundred bucks divided among 27 guys. Say that's a smooth one, but don't fool anybody!"

Know what I'd do? Quit," he replied crisply to his own question. "Wouldn't work another hour for a guy that's going bankrupt as sure as there's a moon. I'd—"

He stopped as Link and Townsend stood around a heap of stony earth. Jackpot's jaw slackened and he flashed a look at Vallie and Roper, after which all three stared down at the black holes of Fleming's and Buster's axgum muzzles.

"You'd quit, would you? Warnin' my men they're likely to get killed, eh, Kilo?" Let me tell you somethin'!" the Star Loop owner rasped hotly, his lips thinned back over white teeth, his words dropping with emphatic reminder. "Nobody asked you wolves for advice. No body invited you here, and you've sure got nerve, interferin' with my men like this!"

"Hold on, Fleming," Roper blustered. "We—"

"I'll hold on nothing!" he flared back. "You bought or scared Boss Torney. I've a hunch that fellow Barrens that left just ahead of Sheriff Stephen might be an acquaintance of yours. Now you're tamperin' with my men. Roper, I kicked you out of my ranch house once. In goin' to kick you off this dam if you don't move pronto. Quit!"

The Box owner's florid face went paler. His under jaw thrust forward in truculent defiance. "You can't prove all yuh said! It's a lie! I can move you out of my here. I'll do too. Stay out—you and your crowd. Get your gear and get round buttin' in where you aren't wanted!"

There ensued a taut silence. Jackpot Mell muttered a stream of hot words. His cold, evil eyes watched Fleming closely, but he saw no chance to throw his own dirty goods on the draw as he was. Townsend had the men directly covered, while Link's gun swung its threat from one member of the trio to the next and back again. Workmen stood nearby, gaping.

"Link, yuh pulled a gun on me before, there at Iron Spring. I didn't say nothin' then. But I ain't used to havin' guys draw that don't mean it."

His voice became deadly with sinister meaning. "Nobody can pull a gun on Jackpot Mell an' live shootin' him. You tried it, didn't you? You tried to pull a gun on me, but yuh can't talk to me like that. I'll bust yuh lousy dam sky high. Wait and see!"

He strode angrily away. Gyp Vallie close behind, wordless, but hurling back sullen, glowering hate that would have frightened men made of less stern stuff. Link and Roper followed, watched them climb the ladder to the embankment top where they huddled their guns. They looked at each other.

"Boss, yore marked. I-I shore wish Mell hadn't put yuh down in his callin' list like that." Buster shivered slightly. His face was deeply troubled as he shook his head. "I wouldn't want Jackpot's gun!"

He's one of the surest killers in the west!"

Plainly Townsend regarded his employer as a doomed man. If Jackpot meant to kill him.

Link scowled down, trying to tell himself this was fooliness, too profound a respect for life shooting and his record of cold-blooded killings that was wholly unwarranted by facts.

Yet . . . A cold thrill seemed to crawl slowly up his spine. He could not hope to draw with lightning dexterity to equal Jackpot's. His marksmanship was inferior, even doing his very best. Seven men had been hurtled into eternity by the roar of the gambler's guns.

Seven men. . . Seven men . . .

The phrase rang through his brain with dire ominous significance. "Link Fleming was crazy—must've been!" He seemed to hear post-mortem gossipers. "Would a sane man go up against Jackpot Mell? He's a dead shot, hasn't got a nerve in his frame!"

Fleming passed a hand over his forehead, shook himself grimly, and turned. It was no disgrace to feel apprehension about a thing like this. . .

"Get the boys back to work, Buster. To shake the fearful, pitying eyes of his foreman off him, Link turned and went up the ladder. Reaching the top he found Helen waiting, looking from him indecisively after Kilo, Vallie, and Jackpot."

"What happened? What were you quarreling about?" she breathed anxiously.

He did not answer for a moment, then his eyes, hard with anger, softened. Link reached out and patted her arm.

"Leave worries to me, honey," he said in a low tone. "I've got a lot already. A few more won't matter."

(To Be Continued)

Mechanical Interpreter

Machine Like Typewriter Translates Many Languages Into French

The "robot interpreter" is but one proof that the Riviera is sparing no effort to attract visitors whose number dropped so heavily during the past two years.

This latest invention to make things easier for foreigners is similar to a chocolate-vending machine in appearance. For one franc (about 64 cents) it will translate into French any question the visitor may ask.

These wonder machines will be installed shortly all along the French Mediterranean coast. They comprise a special keyboard, like that of a typewriter, in which the question is composed in English, German, Spanish or Italian. Immediately the French translation appears on a luminous screen, electrically operated.

A special fund of more than half a million francs (\$34,000) will be used for this and other forms of propaganda to attract tourists from all parts of the world.

Only One Member Alive

Out Of First Cabinet That Was Formed In Alberta

It is almost 31 years ago since the first Governments in the Province of Saskatchewan and Alberta came into being. In that period every member of Alberta's first cabinet except its Prime Minister, Hon. A. C. Rutherford, has passed away, while the death of Justice Lamont, of the Supreme Court of Canada, was the first break in original government of Saskatchewan.

Scott, that province's first Premier, is still alive. So is Hon. W. R. Motherwell, its first Minister of Agriculture, and Hon. J. A. Calder, its first Minister of Education. The latter two are still in public life.—Lethbridge Herald.

Leaves Public Guessing

New Type Picture Is Built Around Razor Blade

One artist seems to have solved the problem of what to do with old razor blades.

He is Ramon Rebajas, who is exhibiting in New York a picture called "White Man's Dust." Glued to the canvas is the old razor blade, and round it are pins and needles, curtain rings, a toothbrush, tacks, dice, and a few examples of jewelry from a five-and-dime store.

The work is intended to convey Mr. Rebajas' "message" to posterity, he says, but leaves the public to decide what that message is.

Derived From Italian

Starboard and larboard, meaning the right and left sides of a boat, came from the Italian words, "a bordo" and "lo bordo," which were contractions of "quarto bordo" and "quello bordo," meaning "this side" and "that side."

So curious are the effects of infrared photography that various black dyed objects may appear in a picture as grays from practically white to black.

Cheerful funerals are now fashionable in Manchuria.

Nature Taking Revenge

Floods And Dust Storms Follow Depletion Of Forests

Graphically and with dramatic force H. H. Bennett, chief of the United States Conservation Service, seeks to arouse the countrymen to the national catastrophe unfolding itself before their very eyes.

For, as he declares to them in clarion tones, the havoc wrought by this year's Spring floods, and the toll taken by the recurring dust storms, are due entirely to man's folly in clearing away the forests.

Nature is taking her revenge by carrying millions of tons of rich soil to eternal waste. Mr. Bennett describes in deadly detail just how it is being done. He declares that these millions of tons of soil are being lost to the broad valleys all we hear about is the loss of life and property.

Little, he says, is ever heard about the simultaneous soil loss, which year in and year out averages \$400,000,000.

It will be a tragedy indeed if the lessons taught in recent years in the Canadian West go unheeded. There are disturbing signs that with the advent of another cycle of wet years this may be the case.

And yet another drought period is as certain as the rising of tomorrow's sun. Its ravages, should little or nothing be done in the meantime to prevent them, will without the slightest doubt be quite as devastating as those from which we are only now beginning to recover.—Winnipeg Tribune.

A Tall Drum-Major

Abyssinian In Royal Band Is Over Seven Feet

Balihu, the Abyssinian drum-major, 7 feet 7 inches tall, was discovered by Emperor Haile Selassie.

In October, 1934, Balihu was brought to Addis Ababa from Jimma to be tried on the charge of having murdered a friend.

In peace-time the shillit, which is the highest court in Abyssinia, is held every Friday. Very often the emperor is the chief judge, and thousands of people are present at the hearings.

When Balihu was brought forward the emperor was astonished. He had never seen so tall a man before.

His African law is modelled on that of Solomon—"an eye for an eye, and a tooth for a tooth." So the emperor stopped the case by paying a sum of 1,000 thalers (about \$350) to the relatives of the dead man. The next day Balihu was taken to the emperor's court.

He was an umbrella-holder to the five-foot Negus but then he was transferred to the royal band, where he became the drum-major.

Good Habit To Acquire

Outstanding Public Men Are Daily Readers Of Bible

The Watchman-Examiner urges the habit of daily Bible reading by calling attention to the fact that the Prime Ministers of Great Britain, one after the other, have been men of the Bible. The only exception, Gladstone was based upon what he called "the impregnable rock of Holy Scripture." Lord Salisbury was a devout churchman, and so was Aquilino, the Congregationist; Balfour, MacDonald, and Bonar Law, the Presbyterians; Lloyd George, the Baptist, and Stanley Baldwin, the Anglican of Methodist ancestry, who in outspoken fashion, confesses that without the Bible, he would be hard pressed by the weight of his responsibilities.

John Bright, the British Quaker statesman, lifted the oratory of the House of Commons and of the political platform into the realm of prophecy by his devotion to the Bible. King George promised his mother, Queen Alexandra, that he would read the Bible every day, and he stated that he kept the promise.

Parks As Memorials

Suggested To Commemorate Late King George And Queen Astrid

When King Leopold was staying at Buckingham Palace in January he mentioned to the King and Queen Mary the project of a series of children's parks in Belgium to commemorate the late Queen Astrid. Now it seems likely that the memory of the late King George is to be kept in the same way in England.

It is typical of the great interest that is taken in children and their welfare by modern royal personages that two great royal child-lovers, both beloved of their people, should be remembered in the same way.

Features Single Product

A museum, one of the first of its kind, has just been opened at Hala, Hungary. It features a single product, the famous Hala lace, made by descendants of the Cumansians, a tribe of Turkish origin who settled in the country in the early days of the thirteenth century and introduced their highly decorative arts to the eastern world.

More than half the tea exported annually in the world is drunk in England and Scotland.

Separate recipes for the servants were contained in a Norwegian cookbook printed in 1830.

Canoing In Prince

Albert National Park

Indications Point To Big Tourist Season For Saskatchewan's Scenic Playground

The fame of Prince Albert National Park in northern Saskatchewan as a veritable canoeist's paradise has been spreading ever since the formal opening of the 1,800 square mile playground in 1928 and officials of the Department of the Interior in the park are now in the midst of preparations for one of the biggest seasons in the history of this great recreational area. Here, among the forests of birch, spruce, and jack pine are thousands of crystal clear lakes, connected by innumerable rivers and streams to form a network of waters, which provide continuous waterways for hundreds of miles.

Since the earliest days of the fur trade, the great highway has been travelled by the trapper, hunter, and trader to and from the north country and Hudson Bay. The steady march of settlement has broken through the solitudes that once closed this area to all but the most venturesome and the construction of modern motor highways and other developments within the park area have placed the glories of this maze of water courses within the reach of the canoe-minded vacationist.

The park is usually approached by way of the city of Prince Albert, which is the principal outfitting point for the northern part of the province. All of the usual equipment necessary for an interesting canoe trip may be transported over the all-weather highway leading to the southeast corner of the park when that highway connects with the government road to Lake Waskesiu, the first of the large lakes of the park to be reached. Canoes and other watercraft may be rented from boat livery in the park at reasonable rates.

As progress is made by the canoeist while on a cruise he will discover mile after mile of fine, sandy beaches, where it is a real delight to bathe and where the urge is ever present to stop and pitch one's tent.

Numerous short trips may be taken but the adventurous canoeist will not rest content with the attractions of Waskesiu, Kingemere, and nearby lakes. By making a few comparatively short portages a score or more of other lakes may be reached and a cruise embracing the entire circuit of the park can be made in less than a week.

From Waskesiu lake a route of exceptional appeal leads through the swamps to the charming sheet of water, Kingemere lake. A cluster of smaller lakes, Ajaawa, Lone Island, Sanctuary and others connected by waterways give access to Lavalie lake with its interesting rookeries of cormorants and pelicans. The return trip may be made over the same route or from Kingemere lake an alternate route by way of Crean and the Hanging Heart lakes permits a visit to the northeastern section of the park.

Boys Rug In Scotland

Glasgow Weaves World's Largest Carpet For Indian Ruler

That the world's largest one-piece machine-made carpet has been completed at Glasgow for the Maharajah of Jodhpur, is evidence the East now is coming West for its carpets.

Weighing nearly a ton, the rug is 30 feet long and 27 feet wide. It will be shipped to India in a specially made tin-lined case, hermetically sealed as a precaution against damage in transit.

Gold in color, with a blue and green border, the mammoth fabric was woven on the widest carpet weaving loom in the world. Each strand of yarn is composed of nine separately spun threads and each square inch contains 96 tufts or knots, making a total of 30,000,000 tufts in the whole carpet.

For Use In Transfusions

Human Blood Can Be Preserved For Several Weeks

For the first time in this country, blood "banks," equipment for preservation of human blood for use in transfusions when a donor is not available will be installed in the County Hospital, Chicago.

The "banks" are refrigerators in which the blood, to which sodium citrate has been added, to prevent clotting, is kept at a temperature just above freezing. Blood can be preserved this way for several weeks, Dr. Fantus said.

All desert creatures are provided muscally with the ability to shut out from their nostrils and eyes the sand that is blown by the strong winds. Most of the insects are wingless, that they may not be blown away.

"So you were in the army, Key?" remarked an acquaintance to an ex-serviceman.

"Oh, yes, I was in the army," was the prompt response. "I was in the army." "Did you get a commission?"

"No, only my wages."

At one time, pepper was considered as valuable as precious metals.

ALMOST CRIPPLED WITH KIDNEY TROUBLE

Alcoholism causes constipation, liver complaint, and dizziness. FRUIT-A-TIVES brought relief in very short time.

Says Mrs. A. Aubrey, Montreal: "I was troubled for years with liver complaint and dizzy headaches. I was constipated and almost crippled with kidney trouble. After taking Fruit-A-Tives for a very short time my health greatly improved. I highly recommend Fruit-A-Tives to anyone suffering as I did." Fruit-A-Tives are the discovery of a famous Canadian doctor. They contain extracts of fruits and herbs. They cleanse all the eliminatory organs and their tonic effects help bring new energy.

Little Helps For This Week

NOTABLES TO VISIT CAPITAL

(Continued from Page One)

will not be completed before that date, it has been announced. A ferry service will be in operation this week across the flood area, however. This is sure to delay motor traffic to the northern town.

Considerable demand is being made here for payment of the unpaid saving certificates by the government on a pro rata basis, instead of as at present to selected holders of the certificates. Mr. Manning pointed out, in reply to a presentation of the case, that the policy of the government is to pay for certificates held by people where there is special need for the money. If the payments were made on a pro rata basis, he explained, his holders, such as bond holders and corporations holding bonds and certificates would get large sums on a percentage basis, while the poor, small holder would receive an infinitesimal sum for his or her certificates. The fairer way is to follow the course now being followed by the treasury department and pay only where there is real hardship and need.

Rev. H. A. Sovereign, Bishop of Athabasca, is reported from Ottawa as saving many families from the fires in Alberta are trekking into the Peace River country and settling on farms "rather than line up before soup kitchens." He said there is a total of 75,000 settlers now in the district.

On June 5, it is now definitely settled, His Eminence Cardinal Rodrigue Villeneuve, Archbishop of Quebec, will arrive in Edmonton on his first visit to Western Canada as a cardinal. It will be the first time any cardinal has visited Edmonton. He will be greeted at the station by civic, government and church officials, and he will spend four days in the capital.

Another national figure will be in Edmonton on August 13th in the person of His Excellency the Governor-General of Canada, Lord Tweedsmuir, who will be accompanied by Lady Tweedsmuir and a party of his Ottawa staff. This will be the first visit of His Excellency to the West since assuming office. They will stay at Government House with Lieutenant-Governor W. L. Walsh and Mrs. Walsh for one night. They are on their way to Jasper Park and the Pacific Coast and are expected to stay longer on the return trip.

It was announced at the office of Hon. E. C. Manning that the full provincial sales tax must be paid on the purchase price of tailored clothing and on other articles made to order, but no tax is charged on rental or show repair work. Dealers are rendering professional services and are not required to collect the two per cent tax from clients paying for such services, it was explained.

For the first time since April 1st, there has been a rush of Eastern buying orders for Alberta bonds, according to Edmonton brokers. The report is said to be due to reports that the Alberta delegation, headed by Premier Aberhart, will finally reach an agreement with the Dominion government over refunding and other questions of a financial character.

A new, secret process for coal has been presented to the provincial government as a possibility for making Alberta fuel coals the equal to any on the market, no matter how

far it has to be shipped. It is possible that a \$500,000 plant for processing coal may be established at some point to handle the work. Should the plan suggested by representatives of the Montreal firm of engineers, the Grant Engineering Company, Limited, be undertaken, it would likely mean that Alberta will supply many thousands of tons of coal now being supplied to Eastern and middle Canada and the Western United States. It is estimated that \$70,000,000 yearly imports will be turned into exports if the plan succeeds by those sponsoring it. No action of the government can be taken until Premier Aberhart and other cabinet ministers return from their trip East after the Victoria Day holiday.

Lowered Estimate of U.S. Winter Wheat

A winter wheat crop of 463,708,000 bushels was indicated in the United States by conditions as they existed on May 1st, according to the official report of the United States Department of Agriculture, issued this week. This is a decrease of some 30,000,000 bushels from the April 1st estimate. It is an increase of 30,000,000 bushels from last year's production.

The estimate suggests that the rains received in the winter wheat area during the last week in April were too late to be of much benefit. During the past week, further rains have been received in the winter wheat area. Whether this will benefit the crop or not is the question. Late rains last year in that area merely paved the way for a major rust infestation by promoting late growth. For four years now the United States winter wheat area has produced small crops. This condition has never occurred before.

Crown M.D. Meeting

(Continued from Page One)

to get assistance in travelling certain roads.—Carried.

Inspectors Appointed

Moved by Hall: That the following be weed inspectors for the several divisions, for the coming season:

Arthur Sissons, Div. 1—18 days at \$6 per day.

S. H. Farewell, Div. 2—12 days at \$6 per day.

William McNab, Div. 3—12 days at \$6 per day.

G. Armstrong, Div. 4—12 days at \$6 per day.

W. B. Fleming, Div. 5—12 days at \$6 per day.

William Chessor, Div. 6—12 days at \$6 per day.

—Motion carried.

The Council are not in favor of allowing seed grain to W. A. Geddes.

Moved by Huettelheuser: That following levies be made for the several school districts (in mills):

Abirdale ... 7.5 Milton ... 8.3

Aspelund ... 10.6 Mt. Grove ... 9.5

Blindman ... 8.8 North Star ... 5.1

Brookfield ... 7.3 Pleasant Hill ... 6

Canyon ... 4.3 Poplar Ridge ... 5

Central ... 6.6 Progressive ... 10

Cross Roads ... 6 St. Patrick's ... 11.5

Eclipse ... 7.3 Spring Valley ... 7.9

Elkhorn ... 8 Spruceville ... 8

Eureka ... 9.5 Sunny Crest ... 7.6

Gull Lake ... 10.4 Turville ... 5.9

Lakeside ... 8 West Branch 11

Lincoln ... 9.6

—Motion carried.

Moved by Hall: That the following pay sheets be passed: No. 2, \$177.79; No. 3, \$222.30; No. 4, \$36.75.

—Carried.

Accounts Passed

Moved by Hall: That the following accounts be passed and ordered paid:

F. Matjeka, \$54; E. A. Carter,

\$31.50; S. M. Wheeler, \$65; H. Reiter, \$176.25; W. J. Stephenson, \$16; E. C. Chapman, \$10.50; Chas. Ball, \$61.75; C. M. Williams, \$50.50; P. A. Switzer, \$82.75; J. MacNab, \$63.75; J. McKibbin, \$22.50; G. H. Reiter, \$30; C. L. Koehner, \$42.

W. H. Shoppard, \$102; A. Larson, \$35; Shebana Bros., \$9; F. Moore, \$9.50; Abe Parker, \$9.00.

G. Fosnough, \$26.25; A. W. Miller, \$37.30; A. Gilmour, \$4; Atlas Lumber Co., \$1.05; Owl Economy Store, \$10; A. A. Drums, \$12.46; Calgary Power, \$1.50; Western Globe, \$3; Army and Navy Stores, \$38; Thomas & Co., \$30; W. H. Clark, \$1.15.

Morning side

MORNINGSIDE—Mr. Walter Porter, our genial merchant and postmaster, returned home last week after spending the past six months in Ontario.

Miss Ferrol Hostey and Mary Gannon of Calgary are spending a few days at the homes of Mrs. Roy and Mrs. Paul Flegel.

Leave For B.C.

Mrs. S. Chesney, vice-president of the W.M.S., entertained the members of the society last Thursday afternoon and a very pleasant time was spent. Meeting opened by all singing "O God Our Help in Ages Past," after which several members took part in the Scripture lesson. Prayer was offered by Mrs. Charles Murdoch. Expressions of regret were shown to Mrs. Charles Murdoch, who with her husband and three daughters leave this week for B.C. Mrs. Murdoch has been a very faithful and efficient member of the society for the past ten years and will be greatly missed, not only in W.M.S. work but in all the social activities of the neighborhood, and the vacancy will be difficult to fill.

However, we are confident that our loss will be some other society's gain, and wherever they may find a home in B.C., the best wishes of everyone go with them and all sincerely hope that the change of climate will prove very beneficial to Mr. Murdoch, who has been in very poor health for some time.

Friday evening a few of their neighbors and friends met at their home and presented them with a brass tray and leather-bound snap

Sunday School—11:00 a.m.

Next Sunday, which is Conference Sunday, the morning service will be taken by Rev. H. D. Marr, B.A., of Calgary, and the evening service by Rev. A. A. Lytle, B.A., also of Calgary.

The Ladies' Guild will meet at the home of Mrs. William Teward at 3:30 p.m. on Wednesday, June 3rd.

CHRISTIAN SCIENCE
At all Christian Science Churches next Sunday, the subject of the Lesson-Sermon will be "Ancient and Modern Necromancy, alias Mesmerism and Hypnotism, Denounced." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "Blessing and glory, and wisdom, and thanksgiving, and honor, and power, and might, be unto our God for ever and ever. Amen." (Revelation 7:12). One of the correlative passages from "Science and Health with Key to the Scriptures," by Mary Baker Eddy, is as follows (page 104): "Christian Science goes to the bottom of mental action, and reveals the theodicy which indicates the rightness of all divine action, as the emanation of divine Mind, and the consequent wrongness of the opposite so-called action,—evil, occultism, necromancy, mesmerism, animal magnetism, hypnotism."

CANADIAN VISIBLE WHEAT

On May 1st, stocks of wheat in store in Canada totalled 185,172,053 bushels as compared with 214,254,581 bushels on the same date a year previous.

Oil extracted from cherry pits is becoming commercially valuable.

PLANS MADE TO MAKE WAR ON GRASSHOPPERS

War-like preparations are going ahead in Southern Alberta to ward off a prospective plague of grasshoppers. A map of the south, prepared jointly by the provincial and federal departments of agriculture, shows in colors the divisions where trouble is expected and also the degree of intensity. Warm, dry weather, so badly needed for seeding, will be propitious for grasshopper hatching.

IMPORTANCE OF AGRICULTURE

Five million Canadian people are employed in farming, and a further number depend entirely on farming for their subsistence, James G. Parnell, Deputy Minister of Trade and Commerce, pointed out recently. Unfortunately, this latter number varies with the prosperity of agriculture, and the decrease in urban employment is depressed, contribute an important factor in our relief problem of today. From 25 to 35 per cent of our railroad freight comes directly from the farm. On a ton-mile basis, because of the long grain haul, about 50 per cent is attributable to agriculture. Again 40 to 50 per cent of our total export trade is made up of products of farm origin and this is a prominent influence in the balancing of Canada's indebtedness.

National Floral Emblems Chosen As Symbolical Of National Characteristics

Mother Canada and four of her provinces—Nova Scotia, Manitoba, Alberta and Ontario—have adopted native floral emblems. Canada's emblem, the Maple Leaf, like the Trillium of Nova Scotia, was highly favoured more than a century ago. The former, like the Rose of England, the Thistle of Scotland, the Shamrock or Ireland and many of the older national emblems became established without official enactment or public proclamation. The Trillium, the Anemone of Nova Scotia, the Anemone patiens of Manitoba and the Wild Rose of Alberta have been made official by provincial legislation and a bill already prepared to give official standing to the Trillium for Ontario it is expected will be enacted by the Ontario Legislature during the present sitting.

National flowers have in certain countries a peculiar significance or are symbolical of the characteristics or feelings of the nations. In many cases, as in the Canadian provinces and in the United States, the chosen flower has been adopted by legislation. In other cases as in several European countries, in Egypt, India and Japan it has by its association with poetry, religious ceremonies or popular sentiment of the people, gradually become universal and recognized as the nation's symbol. In connection with each of these there is an interesting story.

The Canadian emblem more than a century ago was regarded as highly symbolical of the Canadian people. This was indicated at a banquet of the Saint-Jean Baptiste Society held in Montreal on June 24, 1836. The banquet hall was profusely decorated with branches and leaves of the Sugar Maple and the main speaker Denis-Benjamin Viger spoke eloquently of the virtues of the Maple tree which was highly praised for its sturdiness in the forest, the substantial character of its wood for fuel and lumber and its great service to the pioneer in its annual harvest of syrup and sugar. The sentiments expressed by the speaker were undoubtedly popular in those early days of Canadian life.

The Trillium, the flower of the official emblem for Nova Scotia in 1901, was highly regarded as early as 1825 when the flower was represented in a decoration that appeared on the front page of "The Nova Scotian". Thirty years later it was associated with the rose, the thistle and the shamrock on postage stamps. This flower is also the State Flower of Massachusetts where it is better known as the Mayflower. There its name was associated with the Pilgrim Fathers who, at the end of their first winter of great privation, on seeing the first flowers of the spring appearing from soil called the plant the Mayflower after the historic ship that brought them to Plymouth Rock.

The Manitoba emblem, the Anemone patiens, chosen by the provincial Horticultural Society was made official in 1902. Also known as the Windflower and Pasque flower it is the State flower of South Dakota.

Alberta's emblem, the Wild Rose, is also the State flower of North Dakota, Iowa, New York and Georgia. Following a suggestion by the editor of an Edmonton newspaper that the province of Alberta should have a floral emblem, the Women's Institute took the matter up, and passed it on to the Department of Education. The choice of the native rose was made by the school pupils of the province.

Ontario's choice, the Trillium grandiflorum, also called the Wake-robin, was accepted by the Ontario Horticultural Association in 1935 after it had been recommended by a committee of botanists who canvassed the views of the Horticultural Societies in the provinces as well as the High Schools and Collegiate Institutes. The Trillium, thriving as it does in woods over most of the province, responds well to cultivation in the garden but must not be used as a cut flower because the bloom cannot be picked without taking with it all the foliage which is needed to develop the bulbous root for the following season's bloom. For this reason the Trillium should not be thoughtlessly gathered in the woods.

The rose of England as the floral emblem dates back to the thirteenth century when Edward I. chose it in honour of his mother who was known as the Rose of Provence. Two centuries later Henry VII. chose for his badge the Tudor rose which is described as a double red bloom with a white centre. The Thistle of Scotland served a useful purpose in the early days when a night attack was being made by a Danish army. A barefooted Dane stepping on a thistle cried out, giving alarm to the defending soldiers who quickly drove them off. The Leek for Wales was also chosen for its service in war. When Cadwallan, the Welsh leader, was about to meet Edwin, King of Northumbria, he ordered his men to wear a leek in their helmets to enable him to distinguish them from the enemy soldiers. The result was

victory for the Welsh and the choice of the leek as the nation's emblem. Ireland chose the Shamrock when it helped St. Patrick to make clear to the worshippers the mystery of the Trinity.

The Fleur-de-Lis, or Iris, the French emblem, is said to have been used in coronation ceremonies. When a king was crowned he was carried amongst his people carrying an iris to represent a sceptre.

Interesting stories could be told about the Lotus of Egypt and India, the Chrysanthemum of Japan, the Cornflower of Germany, the Linden of Prussia, the Amarant of Sweden and of the 40 odd State flowers of the American Union. Most of the U.S. State flowers have been adopted within the past forty years, some by the school children but in most cases by the State legislatures on the recommendation of authoritative bodies such as the Daughters of America.

Prairie Pasture Grasses

Three Species Adapted To Different Areas In West

Three species of perennial grasses—brome grass, crested wheat grass and slender wheat grass—are well adapted to pasture in the Prairie Provinces of Canada. Broadly speaking, crested wheat grass is well adapted to the brown soil zone, while brome grass and slender wheat grass are better adapted to the dark brown and black soil areas.

Crested wheat grass has been grown in a small way in Western Canada during the last few years but only now is it coming into general use. While the seed is still comparatively expensive, its production is being increased very rapidly, about 300,000 pounds having been produced in 1935. Crested wheat grass produces seed in a much needed perennial hay and pasture crop for the semi-arid sections of the West. At the University of Saskatchewan crested wheat grass has yielded at least as much as brome or slender wheat grass over a six-year period, and in the winter months it produced twice as much as either of these. It is high in feeding value, withstands grazing well, does not become root-bound, provides feed in the early and late parts of the season, and produces seed abundantly.

Probably the best early hay and pasture crop for the Park Belt of Western Canada is a mixture of brome grass and alfalfa. The mixture produces a superior quality of hay, and the yield is likely to be greater than either crop by itself.

Bank Debts

Amount Of Cheques Passing Through Banks Show Increase

Bank debts or the amount of cheques passing through banks in the three months ended March 31 showed a considerable increase over the corresponding period last year, the Dominion bureau of statistics reported.

Bank debts totalled \$8,358,328.28, an increase of \$1,351,437.47 or 19.3 per cent. over the first period of 1935. The prairie provinces showed the largest percentage increase in the clearing house centre with debts of \$1,476,546.67, an increase of \$446,342.36 or 43.4 per cent. over last year, and British Columbia was next with \$502,046.53, a gain of \$118,126.781 or 30.8 per cent.

Just An Old Story

Depression Goes Back Fifty Years For This Man

James Day—a lion-like man of white hair wearing his head, obscuring all but twinkling blue eyes, a high hooked nose and a flowing white beard hanging to his chest—appeared before Recorder Semple in Montreal on a charge of begging.

"And when," queried the recorder, "did you first hear that times were bad?"

"Fifty years ago," the recorder studied the man, concluded it was possible and allowed him suspended sentence.

Counted Him Out

An actor, who as not so well known as he thought he was, received an offer of a part in a new London show. Being on tour at the time he replied by telegram:

"Will accept double what you offer. Otherwise count me out."

Next day he received a telegram which read:

"One, two, three, four, five, six, seven, eight, nine, Out."

When the gray squirrel population becomes too numerous in a region, the squirrels, there is a huge migration with much excitement.

As "scarecrows" to discourage coyotes, western shepherds had that lighted lantern hung on poles near the flocks at night are effective.

Disease Prevention

Public Should Take Cognizance And Act On Information Available

It is a fact that while much in the way of public instruction remains to be done, people are much more familiar with the superficial facts of health and disease prevention than they were a decade ago. Yet are the people exercising that knowledge for their own protection? Are they making use of the discoveries of medical science or are they neglecting their part in the community program and throwing the full onus on the family doctor, the public health department or some other agency, expecting them to work "miracles" when trouble comes?

Some authorities are inclined to think the answers to those questions are definitely "yes," making exception for those alert few, who realizing the dangers of communicable diseases and the pitiful aftermath many of them bequeath to the home, have nothing to chance in protection, themselves and their families. In a recent editorial the Toronto Globe called attention to the condition that exists partly as an outgrowth of ignorance, partly of neglect, and

"They (the parents) take no pains to guard their children from infection and so are active agents in spreading the disease—There is no reason why a child, properly safeguarded, should fall victim to any of these communicable diseases."

What are some of the facts? The Globe was drawing attention to. Consider only one disease, smallpox. Recently a responsible public health authority in Ottawa made the statement that so far as the dangers of that disease were concerned, "we are sitting on a powder keg." Less than 25 per cent. of that city's children, according to the latest records, have been vaccinated. If taken in comparison with the provincial average that percentage is not to be regarded as understatement. In fact, it is decidedly high.

Statistics released to the Health League of Canada show that only 10 per cent. to 15 per cent. of the school population in Ontario is vaccinated. The authorities admit having no check on the number of children vaccinated by the family doctors but they have another means of substantiating their records. Practically all the vaccine is distributed from the Central Laboratory in Toronto and over a period of years the distribution does not "begin to approximate the yearly birthrate."

France Has New Car

Is Shaped Like A Fish With Engine At The Back

A new type of motor car, designed by Andre Dubonnet, the French sportsman, has been tested at Montlhery, near Paris, and will shortly be demonstrated in England.

The 21-h.p., 8-cylinder engine is placed immediately in front of the back axle, leaving the front part of the car free for the passengers. The driving seat is immediately over the front axle.

The car is said to be capable of a speed of 120 miles an hour, with a fuel consumption of 40 per cent. less than that of ordinary cars. The body is fish-shaped.

To compare the car with other types, an ordinary model was driven round the track, fitted with an identical engine. Its top speed was registered as 90 miles an hour; 30 miles an hour less than that of the new model.

Created Lots Of Business

Briar Pipes Admired By King Edward Having Big Sale

During the records of sales made at the recent British Industries Fair is one relating to briar pipes. A New York buyer bought up all the samples of the apple-shaped briar Maltese pipe which the King greatly admired when he visited Olympia. A special window display of the pipes was made in New York. Following the King's visit to this island, Malta sold all her briar pipes. One thousand gross have been ordered. The island will be kept busy for 12 months, the works will be extended and employment increased by 25 per cent.

Rock Wool In Canada

The manufacture of rock wool for insulating purposes was commenced in Canada in 1934 and three plants have been established. According to the Department of Mines, Ottawa, the greater part of the Canadian production is being used for building insulation. Establishment of the rock wool industry in Canada followed investigation work in the laboratories of the department. The investigations showed that large deposits of a special type of limestone in the Niagara district in Ontario, were suitable for the manufacture of rock wool. The deposits were discovered during the course of a survey by the department of the limestone resources of Canada.

Government scientists who studied Turkish towels reported that thick, heavy towels were longest, but lighter weight towels dry the skin faster.

Employment in Belgium is increasing.

The SNAPSHOT GUILD

THINK BEFORE YOU SHOOT

Left: A person often can be included incidentally in a scene to aid composition and to denote relative sizes. Right: This is more directly a story-telling picture in which the figure of the boy dominates.

What shall be told to that newspaper paragrapher who recently took the worst possible view of things, but an amateur photographer? We of the Snapshot Guild know that this is a scurrilous card, considering that pictures taken by amateurs are being constantly exhibited in salons and reproduced in magazines and newspapers because of their artistic and photographic excellence.

Publicly, let us disclaim this "wise-cracker," but privately, shall we not confess that most of us snapshot-takers are guilty of "taking the worst possible view of things" more often than we should? Let us acknowledge that there are too many examples of carelessness in our picture taking and strive always to observe the slogan of the Snapshot Guild: "Think twice before you shoot once."

In other words, instead of shooting aimlessly and trusting to luck, let us always take time to secure the best possible composition of our picture subject, for it is composition that makes the difference artistically between a good and a bad picture. Composition is really only another word for arrangement. In photography some arrangements we can make by purposely placing figures or objects, but since in much of our picture taking we are powerless to make any physical changes, we have to make the arrangement wholly by changing the viewpoint of the camera. We may move it a few

Value Of A Garden

Vegetables Fresh From Ground Mean Health To Body

The home garden is no friend of the beauty specialist where complexion is concerned, scientists tell us, because the properly balanced diet containing vitamin and mineral substances will give nature its chance to do what was intended, bring health to the body, and with it, a good complexion.

Vegetables are not the only foods to produce such results, of course, but they are the "deficiency" types which supply the hidden food elements lacking in so many of our modern table delicacies. The fact that they are grown at home and can be used fresh from the garden without the loss brought about by being kept out of the ground, makes them doubly valuable for the health and complexion seeker.

In fog, mist or falling snow, steamers under way must sound blasts of four to six seconds' duration at intervals not to exceed two minutes at sea. On inland waters the fog horn must sound once a minute.

Polar bears in Greenland are awakening from their winter hibernation.

Got What He Ordered

Waiter In New York Cafe Outwitted By Diner

A gentleman with a derby hat and a square jaw went into a little cafe at noon and ordered the 50-cent luncheon. He made out nicely until he came to dessert, when he asked for some cheese. The waiter said he was sorry, gentleman, but cheese would be five cents extra—it wasn't on the regular luncheon. "Well," the patron said, "apple pie is on the regular luncheon. Do you serve cheese with that?" The waiter said they did. "Then," the gentleman said with triumph, "bring me the apple pie and cheese, without the pie, and the crackers that you brought me with my soup that I didn't eat." The waiter brought him three saltines and a small piece of mouse cheese. The waiter said with admiration while he ate it. No extra charge.—New Yorker.

It is claimed that a new enamel keeps clean for several weeks and then merely needs a gentle wipe with a dry cloth. Hope is expressed in June circles that the way may be possible to coat the neck with it.

Sea oranges are animals. They belong to the sponge family and are found in the Gulf of Maine.

Get Busy On A Lovely Panel

PATTERN 5569

Beautiful iris—graceful Spirea—are the subjects of this rich and decorative wall-hanging, which will brighten a dark and needy corner of your living-room, bedroom, hall or den. A bulb, but no frame, is needed. In pattern 5569 you will find a transfer pattern of a wall hanging 15 x 20 inches; color suggestions; illustrations of all stitches needed; material required. To Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

British Government Will Not Consider Handing Over Any Mandated Territories

Campaign To Dehorn Cattle

Work Is Being Neglected And Results In Heavy Loss

With thousands of dollars being lost annually by cattle shippers through shipping horned cattle, the Saskatchewan department of agriculture, livestock division, is planning a widespread campaign to dehorn all cattle according to J. G. Robertson, commissioner.

Ten years ago the department and other interested livestock associations, packers and the like, started a campaign of a similar nature that met with some success. Thousands of cattle were dehorned then. Since, however, breeders have either forgotten or neglected to do such work and the new campaign is the result.

One packing company has estimated the loss through horned cattle butting and knocking animals without horns or themselves while being shipped amounts to \$1,000 a week; \$500,000 on a million head of cattle a year.

Cattle can be dehorned by using special pliers on the horns or, the best way, during the calf stage, according to Mr. Robertson. Here are directions issued by the department.

One proper application of a stick of caustic paint to the nubbin of a calf will prevent growth of horns.

To Preserve Wild Life

East And West Will Work In Close Co-operation

Wild life societies throughout eastern Canada, represented at a meeting in Montreal, endorsed the principle of a national federation of such organizations and appointed a preliminary committee to work out details.

The meeting was told a western association already had approved the federation idea and east and west would work in close co-operation. The committee appointed will ask the Dominion government to call an Ottawa conference.

Members chosen were: Nova Scotia, B. H. Innes; New Brunswick, E. H. Cook and F. Cedric Cooper; Quebec, Col. H. A. Stewart and Charles Fremont; Ontario, Dr. C. G. Keyes and Dr. Arthur B. James; Manitoba, E. B. Pitblado and R. H. G. Bownycastle.

E. Keffer was appointed to represent the Canadian Forestry Association and Prof. W. J. K. Harkness, Ottawa, and B. W. Taylor, Quebec, were chosen as biological representatives.

Agricultural Outlook

Forecast Of Wheat Prices For Current Crop Year Just Worked Out

"The outlook for Saskatchewan farmers for the current," says Farm Outlook, published by the Department of Farm Management, University of Saskatchewan, "is one of moderate optimism. The price of wheat, the principal agricultural product and the most important source of revenue on Saskatchewan farms, is subject to many varied and unappraisable influences of national and international importance, consequently forecasts of wheat prices are little better than guesses. Recognizing its limitation, the Saskatchewan farmer cannot wisely budget for his year on the expectation that the average farm price of wheat for the next crop will be higher than now prevails. At the same time, from the combination of economic and other influences, no material reduction in the average farm price of wheat need be anticipated."

The Royal Marines

King Edward Assumes Colony Of Famous Corps

The King has assumed the colony-in-chief of the Royal Marines. The appointment was welcomed by this famous branch of the fighting services, for King Edward now takes the position occupied by King George.

The Royal Marines last year mounted guard at Buckingham Palace, St. James Palace and the Hyde Park magazine for the first time in their 270 years' history.

Reindeer Moving North

Canada's herd of reindeer wintered in excellent condition, and movement of the herd northward to the summer range along the Arctic coast near Kitiguanuk got under way April 1. The herding of the animals northward is done in a leisurely manner as they are now approaching the fawning season and care must be taken that the herd reaches its destination in the best possible condition.

Problem For Scientists

Scientists are puzzled over a strange flame-colored animal, five feet long, shaped like a pig, reported to have been shot in Verona. The creature's fore feet like a bear and hind feet like a duck. It is the first of the kind known.

Plenty Of Doctors

Doctors from 20 nations, including the United States, will meet at Berlin prior to the Olympic games for an "International Sport Doctors' Congress" to discuss ailments of athletes will be the main topic of discussions scheduled for July 27-31.

Suitor—Honey, don't you think you could manage to live on 25 a week?

Girl Friend Get the license. I'll try it a week.

Demands for a pledge that the government would not consider the cession of any mandated territories were made by Conservative members in the British House of Commons.

J. H. Thomas, secretary for the colonies, replying, said recent statements on the subject by himself and Neville Chamberlain, chancellor of the exchequer, applied equally to crown colonies and mandated territories.

He emphasized that in the mandated territories British possessed no advantages or privileges over other countries. He said if the question of transferring any mandate arose it would not be a question for Britain alone to determine because Australia, New Zealand and South Africa also had mandates.

The British government, Thomas went on, would not consider handing over any of its mandated territories. The whole question as far as empire mandates were concerned also was reviewed. Beyond that it was not only a question of the empire; there was also the question of the mandates affecting France and Belgium. Furthermore, the question must be consulted and their interests considered.

The colonial secretary mentioned he had recently received communications from responsible business firms concerning the future of Tanganyika. He said he would make a specific request by a company contemplating the investment of a further £1,000,000 in Tanganyika.

He told this firm that while they must be the best judges of their own business as far as the political situation was concerned, "I see no reason to believe for a moment that there is anything to warrant me saying it is inadvisable for them to proceed. I said that not only on my own responsibility but with the concurrence of the treasury also."

Mr. Thomas added he hoped the house would not expect him to commit the present or any other government to any course of action. "All I will say," he went on, "is that we have not considered and are not considering the question, but if it is raised by others it will be our duty to consider the circumstances."

Winston Churchill said he regretted the minister had given the impression it was not a closed question. The subject was then dropped.

Water Fowl Preservation

United States Sets Aside Large Areas As Sanctuaries For Wild Ducks And Geese

Better than 2,000,000 acres so far have been set aside in the United States for the wild ducks and geese to use as hiding places from the guns of hunters.

Three times as much land to be used as game refuges is now under the control of the United States bureau of biological survey as there was two years ago. Then it was 700,000 acres. Now it is 2,100,000.

Work on these refuges and sanctuaries is done by the civilian conservation corps in addition to survey experts. Seven times as many C.C.C. workers are now engaged in wild life work as there were a year ago. There are now 5,600 men working to give the ducks and geese a chain of natural resting places along their ancestral flyways.

On the four principal flyways of North America waterfowl—the Atlantic, the Mississippi, the Central and the Pacific—28 C.C.C. camps have been established or approved.

The fowl are thicker along the Mississippi flyway, which includes the ancestral breeding grounds in the plains states. From Montana to Michigan, flocks fly across the Canadian frontier in the fall or start from within the United States border, converging before winter on the muddy, flood-plain delta of the Mississippi. Another flyway crosses the Appalachian states from the north and ends in temperate swamps on the southern Atlantic seaboard.

Coronation Robes

Nobility Of England To Spend Large Sums For Costumes

Peers and peeresses will spend \$500,000 on their coronation robes, which they have ordered.

The cloth crimson velvet of a deep ecclesiastical hue takes six months to manufacture in the north of England. Nearly 1,600 robes have to be made.

Robes cost \$425 each, and coronets \$90.

Plenty Of Doctors

Doctors from 20 nations, including the United States, will meet at Berlin prior to the Olympic games for an "International Sport Doctors' Congress" to discuss ailments of athletes will be the main topic of discussions scheduled for July 27-31.

KING'S JUBILEE
(Continued From Page One)

enabled to get a fairly good view of the procession.
Mrs. Field then told of her visit to Hyde Park that evening and the burning of the huge bonfire, 70 feet high, which was lit by the King pressing a button, and which in turn lighted two thousand other bon fires—making a continuous line of fire about England. From Hyde Park to Buckingham Palace, where thousands were waiting for a glimpse of Their Majesties. Someone started singing "Land of Hope and Glory" and at the height of the singing the

King and Queen stepped out onto a balcony. One of the highlights of the Jubilee, thought the speaker, was the drives taken by Their Majesties through London during May and June, when they were so kind to the school children.

A detailed description was then given of the Jubilee concert held in Royal Albert Hall, Kensington, on May 24th. The hall, built in 1871, has a seating accommodation of

Fine Musical Program
The program depicted music from Shakespearean times down to the present. At the King's request the program was changed so that the last item was the singing of "Jerusalem" by the choir and audience.
Mrs. Field concluded her address by repeating in ringing tones a verse of W. E. Henley's—
"Ever my love endures—England, my England!"
"Take and break us, we are yours, England, my England!"

SAY! ON A HOT MORNING I'LL TAKE MORE OF THESE COOL KELLOGG'S EVERY TIME!
